

Umang Gupta

Senior Software Engineer | Java | Distributed Systems | Kubernetes | AWS • 7+ Years of Experience
Bangalore, India | +91 8826272603 | guptamang769@gmail.com | linkedin.com/in/umang1395 | github.com/guptaumang769

PROFESSIONAL SUMMARY

Software Engineer & Infrastructure Architect with **7+ years** of experience in designing, scaling, solutioning, and building full-stack enterprise applications using **Java, Spring Boot, ReactJS and Microservices** alongside cloud-native DevOps orchestration on **AWS and Kubernetes (EKS/IKS)**, with hands-on DevOps, CI/CD, and site-reliability experience. Migrated **9** CI/CD platform services from EC2 to Kubernetes, reduced a production database from **200M+ to 25M+ rows**, and resolved **250+** security vulnerabilities. Experienced in driving high coding standards, incident response, observability, and implementing strategic infrastructure automation across multi-region cloud applications.

TECHNICAL SKILLS

Core Fundamentals: Java 8/11/21, Data Structures, Algorithms, Design Patterns, System Design, OOPs, JavaScript
Frameworks: Spring Boot, RESTful APIs, Microservices, Spring Cloud, Spring Security, RBAC, ReactJS
Cloud / AWS: EC2, RDS, IAM, VPC, CloudFormation, ALB, ASG, S3, DynamoDB, Route53, API Gateway, Lambda, AWS CDK
DevOps / CI-CD: Kubernetes, Docker, Kustomize, ArgoCD, Argo Rollouts, Jenkins, GitOps
Messaging: Apache Pulsar, JMS, Event-Driven, Pub/Sub
Databases: Oracle/PL-SQL, SQL Server environments, MySQL, PostgreSQL, Elasticsearch
Monitoring & Tools: Splunk, Wavefront, Kibana, CloudWatch, Git, Maven, Jira, Confluence
AI & Productivity: Cursor IDE, Claude, Claude CLI, Gemini, AI Agents, Prompt Engineering, Human-in-the-Loop Validation

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Contract) **Oct 2024 - Present**
Bangalore, India
Intuit (via Dexian)

- Migrated **9 microservices** from EC2 to Kubernetes (IKS) across **13 deployment repos** using Kustomize, HPA, and Argo Rollouts, achieving **zero-downtime** cutover and retiring all legacy EC2 stacks.
- Engineered a database archival pipeline and cleanup API that shrank a MySQL RDS table from **200M+ to 25M+ rows** (87%) and purged **152 GB** of stale data in **under 3 seconds**.
- Upgraded **9 services** to **Java 21** and eliminated N+1 query problems by tuning JPA fetch strategies and HikariCP pools, validated through Karate BDD suites with **zero** regressions.
- Resolved **250+ security vulnerabilities** through automated AMI restacking, security-group parity, and certificate renewal, cutting manual remediation effort by **80%**.
- Designed event-driven messaging on the Apache Pulsar bus across **8+ services** and **990+ tenants** with producers, consumers, and dead-letter-queue handling for exactly-once processing.
- Secured REST APIs with Spring Security using **OAuth 2.0** token authentication and role-based access control (RBAC) across **8+ services**.
- Architected a **dynamic Team View** module in **ReactJS** with **REST API integration**, enabling real-time deployment tracking for 990+ tenants.
- Partnered with SRE and Elasticsearch teams to lead Jenkins/Jira cloud migrations (Route53 cutover across **100+ CI/CD pipelines**, zero disruption) and an FGAC migration, and lead technical innovation by leveraging AI tools (**Cursor, Claude, and Gemini**) in day-to-day development to automate repetitive tasks that lifted productivity **3x**.
- Served on the **24/7** on-call rotation for a platform used by **990+ tenants**, leading incident response and root-cause analysis and driving observability and alerting improvements (CloudWatch, Splunk) that reduced repeat incidents.

Software Engineer II **Sep 2021 - Sep 2024**
Bangalore, India
Dell EMC

- Built **7 REST APIs** for AppSync using Java, Spring Boot, and Microservices to process user requests, discover data centers, and persist results in PostgreSQL.
- Lowered CPU and memory usage by **80%** by automating performance monitoring that pinpointed slow workflows, and trimmed database size by **26%** with scheduled maintenance jobs.
- Mentored a team of **5** to close **40+** customer escalations and ship **20+** hotfixes across releases.

Senior Software Engineer **Feb 2019 - Sep 2021**
Mumbai, India
Capgemini Technology Services

- Developed full-stack features in Java, JavaScript, ReactJS and PL/SQL for insurance clients, decreasing application response time by **30%**.
- Redesigned the dashboard UI layout for a major client application, increasing usability by **70%** based on user analytics; promoted to Senior Software Engineer within **14 months**.

EDUCATION

B.Tech, Computer Science – Guru Gobind Singh Indraprastha University (BPIT), Delhi, India (Aug 2014 - Jun 2018)

CERTIFICATIONS

Oracle Certified Associate, Java SE 8 Programmer (Aug 2019)
